

# December 15th, 2020 - TSC Proposal Meeting

## Agenda

[Cisco APIC controller Plugin](#)

Other topics?

## Participants

Martin H (HPE) Bharath (HPE) Daniel Nilsson (TietoEvery) Jon M (HPE) Jose (AMI) Muthu (AMI) Rafal Szejna (Intel) William Caba (Redhat)

## Notes

### Cisco APIC

Martin presented on the APIC Plugin. He has prepared a document that is on the [wiki](#) which is doing the mapping between Redfish's fabric model and Cisco APIC. We might keep adding use cases to this. William mentioned that this is a great example of a plugin that could live in its own Repo and evolve quicker than the core. We had some discussion around how this ties into the upcoming Composition Service.

**Vote** From Jonas Arndt (HPE) to Everyone: 08:33 AM Vote for approval of the Fabric plugin for Cisco APIC on a conceptional level. +1, 0, -1

From Daniel Nilsson to Everyone: 08:34 AM

TietoEvry +1

From William Caban to Everyone: 08:34 AM

+1

From Rafal Szejna (Intel) to Everyone: 08:34 AM

+1

From Muthukkumaran Ramalingam (AMI) to Everyone: 08:34 AM

+1

From Jonas Arndt (HPE) to Everyone: 08:35 AM

+1
