

May 5 2021 - TSC

Participants

TBD

Proposed Agenda

- Start Recording
- [LFN Antitrust Policy](#)
- LFN Developer and Testing Summit - June
 - ODIM Refresh
 - Other topics?

Notes

LFN DEVELOPER AND TESTING FORUM

Discussion:

- Cannot demo anything (telemetry or composition service) because it's coming up so soon.
- Can do an update on the ODIM project

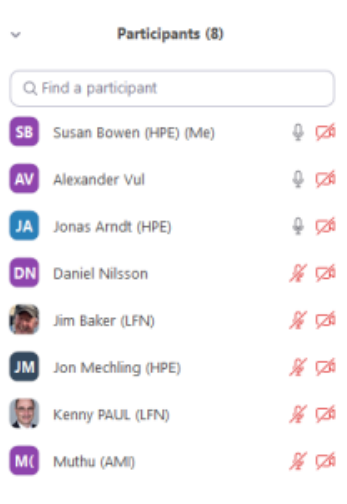

Update

- Jonas can do slides for Dell plug-in, Cisco plug-in
- Jose or Muthu provide slides for composition service (1 or 2 slides).
- BMC Emulator – would Intel like to present a demo?
- NOTE: Jonas will introduce himself as TSC not HPE developing plug-ins for other (competitor) vendors.
- Slide on what's planned for the upcoming ODIM August release.
- Reference back to the demos presented a few months ago for interested people.

Later

- ACTION ITEM: Daniel will provide the super blueprint & ODIM slide. Marketing architecture.

Participants

Architecture recap from yesterday

- Desire to capture discussions so far
- Current architecture
 - Current architecture documented
 - Such as APIs documented
- Intentions on where the TSC intends to take the architecture going forward

Antitrust shown

LFN developer and testing a few weeks from now

- ODIM refresher, nothing new yet to demo.

- Alex sent Jon a bunch of slides presented to the community.
 - Continue to enhance that slide set, maybe even create a condensed shorter version of it
 - Remind people what ODIM is for and why we are doing it.
 - DECISION: only 30 minutes needed.
- Q: Could/would Intel want a presentation on the emulator and maybe demo the BMC emulator?
 - Alex would want to show how it helps to debug services being developed for ODIM or develop RF compliant interfaces (BMC, OCP anywhere).
 - ACTION ITEM: Alex will check with Rafal about demo of BMC emulator
- How can we collaborate on the slide deck?
 - Does it save a new version each time?
 - Upload PowerPoint presentations, edit the entire thing – or work on individual sections.
 - Alex will check on import / export.
 - Upload the same file and it will keep the version history.
- Use same slide template? YES Kenny confirmed
- The online events plus in person events (not happening right now). all total: 4 a year – 2 short and 2 long.
- how ODIM aligns with 5G Blueprint.
 - Super blueprint 2022, also the ONES blueprint ... (Jonas summarized)
 - Daniel: hard to see right now which one – super blueprint and intending to be part of the infrastructure. Baker. Cross-community event – ask don't tell.
 - Jun 7 to 10 (which conference?) – Jonas asked Daniel to contribute a single slide on this. Daniel – where we see ODIM fitting into super blueprint. Maybe a demo track lead will give us an idea of what to do this year.
- ACTION ITEM: Daniel will provide the super blueprint & ODIM slide. Marketing architecture.

Composition Service submission to DMTF (no response)

- Response from John Leuing about how to submit
- Muthu – John sent options for submissions? Three options: ?? feedback , post as bug RF DMTF portal and third one (Muthu didn't say)
- John asked Muthu to attend as the submitter (which meeting?) to answer questions? I was not clear if this is an action item or Alex will track down what John said.

Recording
