Architecture discussion notes

Properties for UpdateService

Intel will bring this for discussion the next week. It was suggested that ODIM certify against OCP profile. And if needed update the OCP profile.

Support redis streams as alternative to Kafka bus

The proposal was discussed and got a query about how support for new message bus will be added. It was explained that the message bus interface is abstracted out. Hence adding support for new message bus only requires a driver for the new message bus. ODIM code will not be affected by this. Also updated the proposal to make this clear.
